ART THERAPY CLASS for Adolescent & Young Adult Cancer Patients Ages 18-42 years old

This virtual group aims to enhance resilience as you explore ways to develop coping through creative processes. We will observe, discuss, create and reflect. Using basic materials, you'll be guided through expressive activities that invite conversation and connection.

Don't feel like creating? No problem—join for the community and conversation. No previous art experience required. You must be a WMCC patient in active treatment or within six months post treatment. Register by March 16th.
